

Fullstack Development 2024-2025

Project: Manchester Sh*tty website

(Dit is een echt zaalvoetbal team waar wij aan deelnemen. Het spijt ons voor de ongepaste naam!)

Description

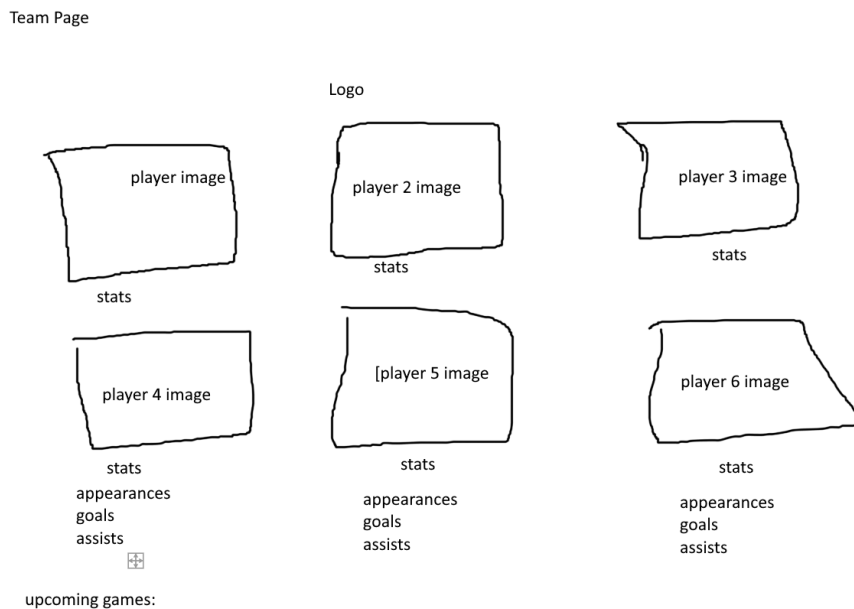

Met de Manchester Shitty website willen wij het mogelijk maken om als een buitenstaander ons team, de komende wedstrijden en de statistieken van de spelers te bekijken. Als een admin moet je in staat zijn om spelers en coaches toe te voegen, wedstrijden toe te voegen en om wedstrijden toe te voegen. Deze moet een admin natuurlijk ook kunnen verwijderen en aanpassen waar nodig. De website moet ook een mogelijkheid bieden om de komende wedstrijden in je agenda te plannen.

User Stories

1) User Story:

As a user, I want to view upcoming matches and player statistics so that I can stay informed about the team's performance.

Wireframe:

Acceptance Criteria:

- The user can navigate to a page displaying a list of upcoming matches.
- The user can view individual player profiles with statistics such as goals, assists, and appearances.
- The match details page includes date, time, location, and opponent information.

2) User Story:

As an admin, I want to add, edit, and delete players and coaches so that I can keep the team roster updated.

Wireframe:

Admin Team edit page

players:				
playername	kitnumber	appearances	goals	assists

Coaches:	
name	role

Acceptance Criteria:

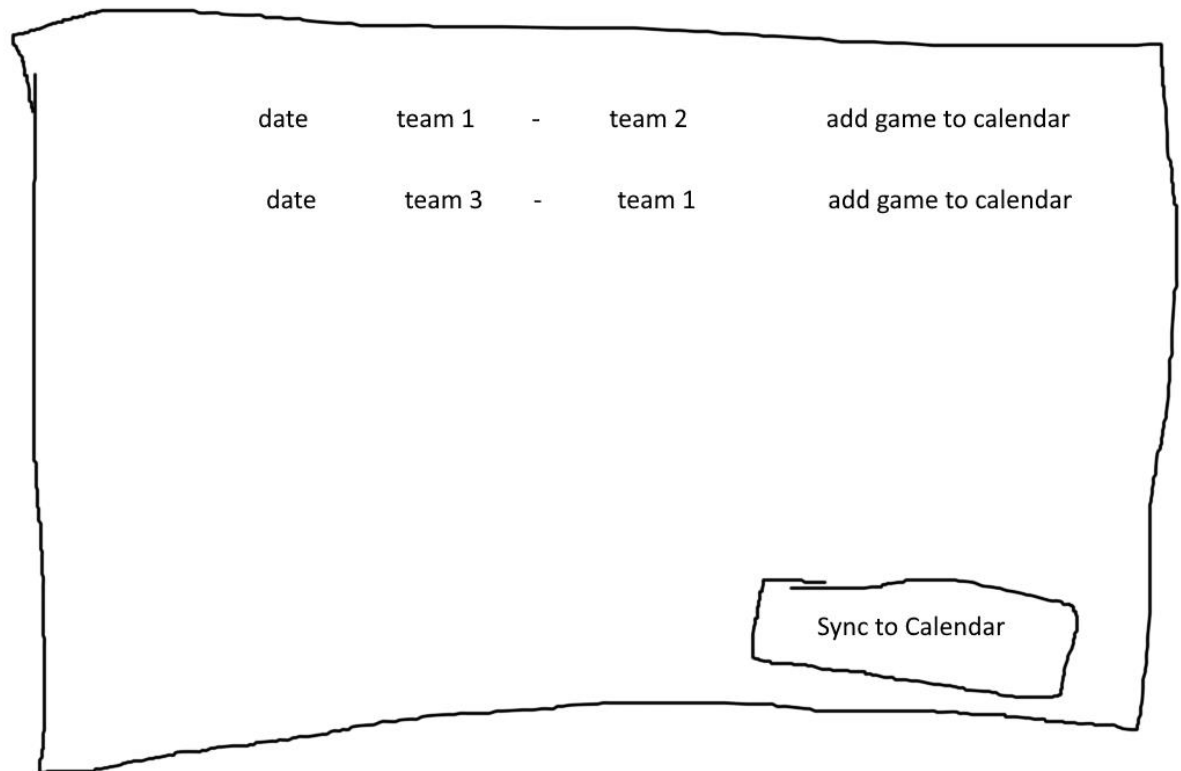

- Admin can log in and access a management dashboard.
- Admin can add new players and coaches with fields like name, position, and stats.
- Admin can edit existing player/coach information.
- Admin can delete players or coaches from the system.

3) User Story:

As a user, I want to add upcoming matches to my calendar so that I can easily track the team's schedule.

Wireframe:

Calendar page

Acceptance Criteria:

- A "Add to Calendar" button is available next to each upcoming match.
- A "Sync to Calendar" button is available at the bottom of the screen to sync all the games to common calendar platforms (like Google Calendar, Apple Calendar, etc.)
- Clicking the button allows users to export the event to common calendar platforms.
- The calendar entry includes the match date, time, and location.

4) User Story:

As an admin, I want to add, edit, and delete match information so that I can manage the team's schedule.

Admin Calendar Edit Page

Game 1:

Date

Home Team

Away Team

Score

Delete Game

Game 2:

Add Game

Acceptance Criteria:

- Admin can add new matches with fields like date, time, location, and opponent.
- Admin can edit existing matches to update details.
- Admin can delete matches from the schedule if necessary.

5) User Story:

As a user, I want to view the full match calendar so that I can have an overview of all upcoming games.

Wireframe:

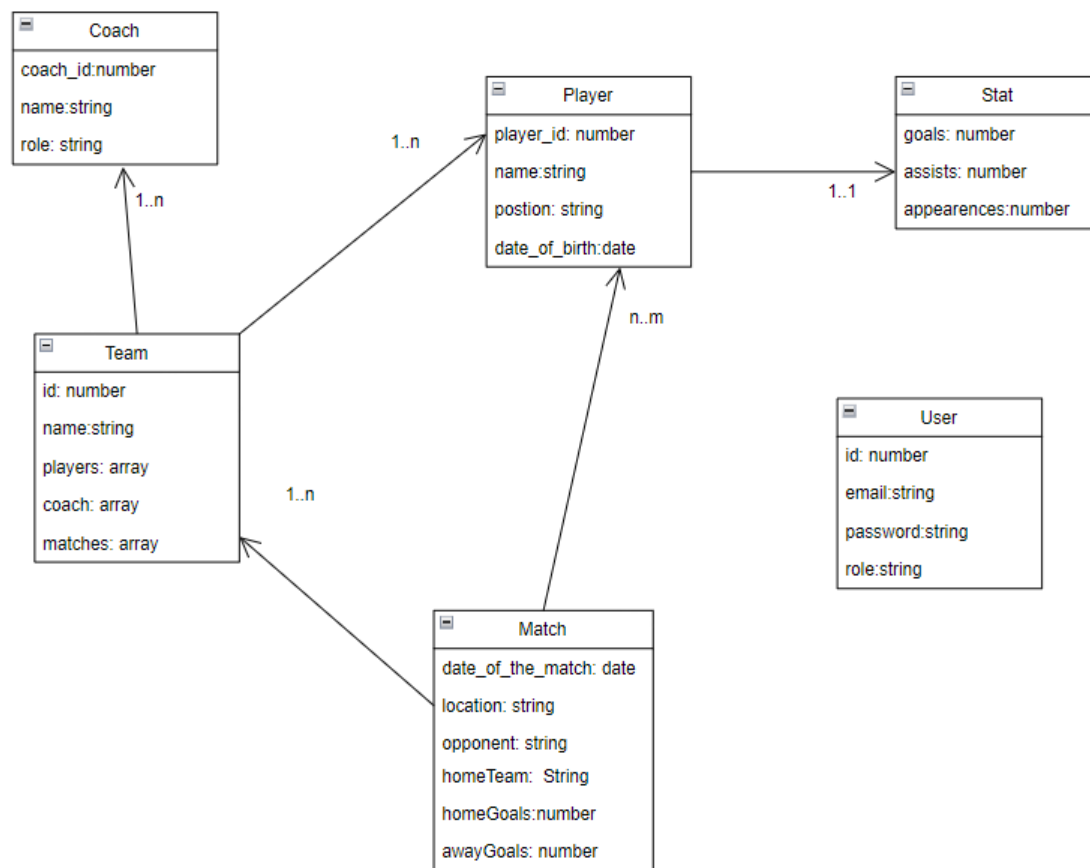

Full Season Calendar Page

date 1	Manchester Shitty - Team 2	location
date 2	team 3 - team 4	location
date 3	team 5 - team 6	location
date 4	team 7 - team 8	location
date 5	team 9 - team 10	location
date 6	Manchester Shitty - team 8	location

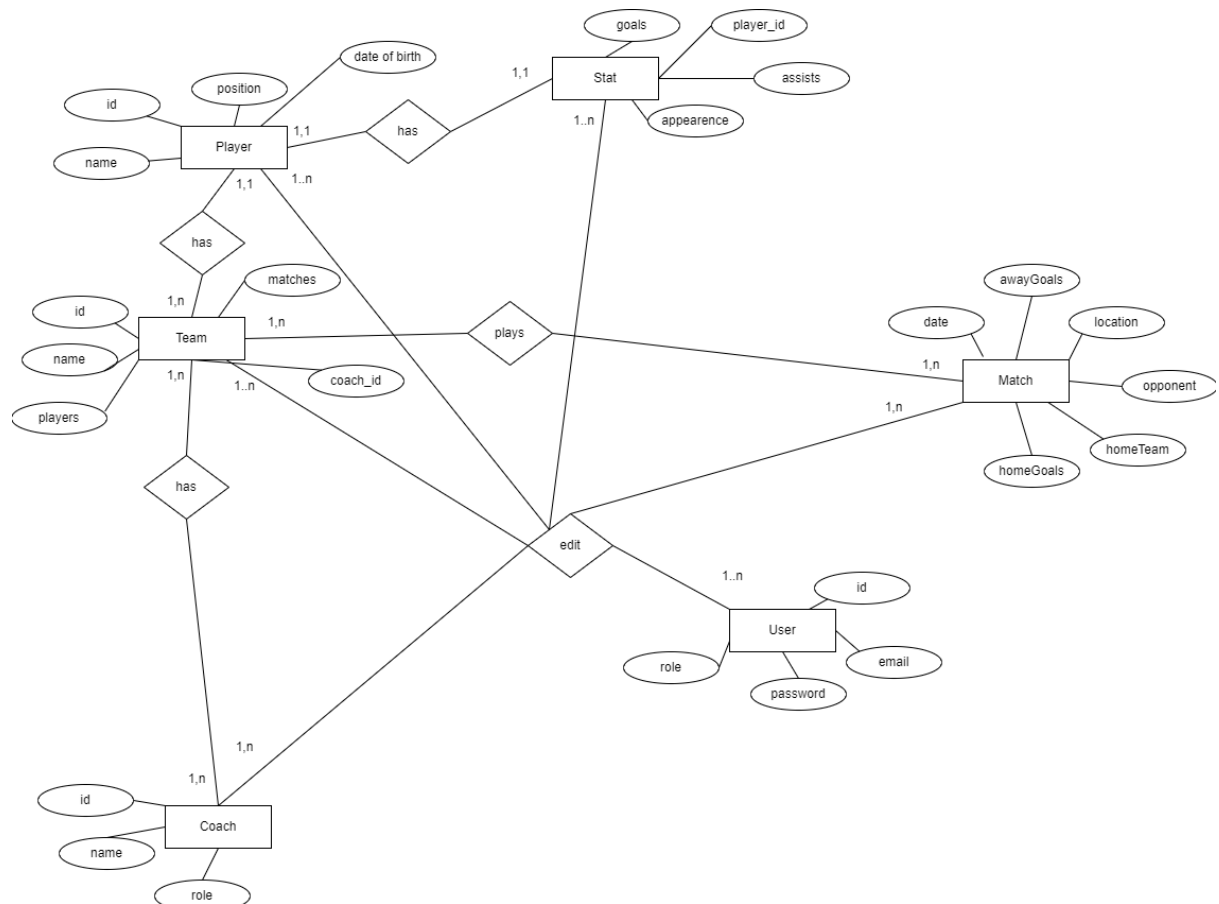

Acceptance Criteria:

- The user can access a match calendar page showing all upcoming matches.
- The calendar is organized chronologically.
- Each match entry includes date, time, opponent, and venue details.
